PROFESSIONAL SUMMARY

SOC analyst and cybersecurity graduate with hands-on experience monitoring 15 municipal networks, triaging alerts, tuning detections, and performing malware and digital-forensics investigations. Known for translating technical findings into practical remediation guidance, clear case notes, and repeatable playbooks. B.A.S. in IT Networking and Cybersecurity, 3.91 GPA, cum laude.

CORE SKILLS

Security Operations: Alert triage, incident response, threat hunting, detection tuning, vulnerability assessment, MITRE ATT&CK

SIEM and Telemetry: Elastic Stack, Wazuh, Microsoft Sentinel, IBM QRadar, Sysmon, Suricata, Zeek, Defender EDR

DFIR and Malware: FTK Imager, Autopsy, Volatility 3, Wireshark, Security Onion, Any.Run, PeStudio, CyberChef

Systems and Automation: Windows, Linux, Active Directory, VMware, pfSense, VyOS, Google Cloud, PowerShell, Python

PROFESSIONAL EXPERIENCE

SOC Analyst Apprentice - Digital Forensics, Malware Analysis and Incident Response Mar 2024 - Present

LetsDefend | Remote | Full-time apprenticeship

Investigated simulated incidents end to end, including alert triage, evidence capture, containment, eradication validation, and case documentation.

Performed static and dynamic malware analysis with PeStudio and Any.Run, extracting indicators and identifying persistence mechanisms.

Reviewed QRadar offenses by correlating rule triggers, logs, and event timelines to distinguish actionable threats from benign activity.

Acquired and triaged disk and memory evidence with FTK Imager and Autopsy, preserving hashes and building investigation timelines.

Analyzed phishing, ransomware, web attacks, and lateral-movement scenarios; mapped findings to MITRE ATT&CK and documented remediation steps.

Tier 1 SOC Analyst / IT Operations Mar 2024 - Dec 2025

PISCES Program / PISCES International | Bellingham, WA | Full-time internship

- Monitored and defended 15 municipal networks using Elastic Stack and Suricata, triaging alerts and investigating suspicious network activity.
- Developed and deployed DNS-anomaly queries that identified a rogue resolver and reduced exposure to command-and-control and data-exfiltration activity.
- Tuned detection policies to reduce false positives and improve visibility into actionable threats.
- Produced vulnerability assessments that mapped CVEs to business impact and cost-effective mitigation roadmaps adopted by participating municipalities.

Reviewed teammates' detection queries and automation scripts, corrected logic and output issues, and recommended implementation improvements.

GenCyber Mentor Summer 2024 and 2025

GenCyber Program | Bellingham, WA

- Taught cybersecurity, programming, and digital-forensics fundamentals to high school students.
- Designed and quality-checked a hands-on security lab, then guided students through execution and troubleshooting.

Network and Systems Administrator Intern Oct 2024 - May 2025

Academic Cybersecurity Lab | Bellingham, WA | Hybrid/remote

- Implemented a reviewed VMware Enterprise network design using VyOS routers and pfSense to model segmentation, secure routing, and perimeter defense.
- Built and hardened Windows and Active Directory systems through firewall policies, service lockdowns, auditing, identity management, and account cleanup.
- Authored and maintained 15 security playbooks and runbooks used by 12 teammates during a live event.

ADDITIONAL EXPERIENCE

IT Support Specialist

May 2022 - Aug 2022

Town of Dover | *Dover, MA* | *Contract*

- Supported municipal staff with endpoint, account, and connectivity issues while coaching users on suspicious-email handling and secure workstation practices.
- Coordinated with third-party IT providers to restore network service and documented hardware, software, and ArcGIS requirements for future upgrades.

IT Consultant

Feb 1995 - Apr 2022

Independent Contract Work | *Rhode Island* | *Part time*

- Diagnosed and repaired Windows endpoints, startup failures, malware infections, driver conflicts, and failing hardware for residential, education, and small-business clients.
- Hardened routers and endpoints by updating firmware, disabling WPS, changing default credentials, restricting ports, and deploying layered endpoint protection.
- Delivered remote support for authentication, email, and endpoint issues and guided users through MFA enrollment, secure password resets, and safe-link practices.

SELECTED CYBERSECURITY PROJECTS

ELK and Suricata Home SIEM

May 2025

Elastic Stack, Kibana, Sysmon, Suricata - Built and configured a SIEM lab that ingests custom Sysmon endpoint telemetry and Suricata IPS network logs. Created Kibana visualizations and investigated correlated host and network activity.

Bastion and Bean Security Architecture

Sep - Dec 2025

Wazuh, Suricata, Zeek, Elastic, Google Cloud - Designed a blue-team architecture with automated cloud deployment, hardened baselines, a NIST-aligned risk register, BCP/DR planning, incident-response playbooks, and SOC workflows.

Wazuh Home SIEM

Nov 2024

Wazuh, Ubuntu, VMware, PowerShell - Deployed Wazuh on Ubuntu in VMware and onboarded a Windows agent with PowerShell. Established a scripted Windows-hardening baseline with approximately 500 commands and validated telemetry in the SIEM.

Malware Intrusion Investigations

May 2025

Security Onion, Sguil, Wireshark, ELK - Investigated a credential-stealing web redirect and Remcos RAT activity. Reconstructed event timelines, preserved evidence, documented findings, and produced remediation guidance.

EDUCATION

Bachelor of Applied Science, IT Networking and Cybersecurity

2025

Whatcom Community College | *Bellingham, WA* | *GPA: 3.91, Cum Laude, Dean's List*

Associate of Applied Science, Information Technology and Network Engineering

2021

New England Institute of Technology | *East Greenwich, RI*

CERTIFICATIONS AND TRAINING

- PISCES Analyst Professional - PISCES International, Sep 2025
- Certified SOC Analyst - LetsDefend, Jun 2025 | Certified Malware Analyst - LetsDefend, Sep 2025
- Google Cybersecurity Certificate, Mar 2025 | Google Cloud Certification, Feb 2025
- NDG Linux Unhatched | TestOut Client Pro | Cloud Security Alliance: Introduction to Generative AI and Prompt Engineering
- Additional credential: Transportation Worker Identification Credential (TWIC), valid through Jul 2030
